---

## Academic Projects

#### **Intranet chat** , *Summer training.*

- Description: Intranet chatting is used basically for chatting purpose with user on local network. When a user want to chat on local host, they send request on local server after this they have to enter port number to establish a connection. This application works on java socket programming which communicates with different users on different ports.
- Language Used: Java, Swing, Socket Programming

#### **Employee Details.**

- Description: This project helps to generate a unique identification number for employee. With the help of unique Identification number we can also save their family details.
- Language Used: Java, Swing.

---

## Extra Projects

### Hotel Booking System .

- Description: In the Hotel Booking System you can search the hotel by city and you can book the hotel room and a user can also update a booking information after booking a room. Hotel and room information also can be updated . The basic functionality is also there is like create a hotel and create a room and find hotel by star rating and a user can comment on hotels.
- Language Used And Tools : Java, Spring Boot, JPA, MySql, Maven.

### Hospital System.

- Description: This is to demonstrate the concept of microservices. How different different Microservices interact each other and here I have created 3 microservices.
- Language Used And Tools : Java, Spring Boot, Microservices, Maven.
